FOR IMMEDIATE RELEASE:

Cutting Edge Solutions Opens Regional Office In Tulsa, Oklahoma

Technology Reseller expanding US Operations by increasing workforce and opening satellite offices around the country.

August 27, 2010, Tulsa, OK – Cutting Edge Solutions (CES), a market leader in designing, implementing and servicing enterprise-class information management and business process automation, announced the addition of a local office in Tulsa, Oklahoma to better service the growing number of customers in the region.

“CES has had its eye on Tulsa and all of Oklahoma for some time now,” said Jack Roberts, President of Cutting Edge Solutions. “Not only do we have a large number of existing customers in Oklahoma, but the entire region is brimming with opportunities to expand the number of organizations we can work with.”

James Meyer, CES’ Regional Sales Manager agrees with Roberts. “As a long-time Tulsa resident, I know firsthand the number of business relationships available in this area,” said Meyer. “As a technology reseller, CES is first and foremost committed to solving real-life business problems. The kind of relationship we want to establish and maintain with our customers requires a hands-on approach with a dedicated local representative,” said Meyer. “I’m proud to represent CES as an organization of experienced and diligent professionals solving real-world business problems.” It is that kind of consistent high-level customer service that has won CES numerous awards, a large amount of repeat business, and overwhelming praise from its clients.

Meyer, a veteran of technology sales and service, recently joined CES to head the Tulsa office. “My goal is simple; create long-term relationships with our clients. We’re not looking for just a sale, we want a customer for life,” said Meyer. “And I have to warn all of new clients that no one gets any special perks from CES. Everyone gets the same outstanding level of service we provide all our customers.”

The Tulsa office will serve as the headquarters for the Oklahoma, Arkansas and Texas region. Myers begins his tenure with CES by touring the region and meeting with its existing customer base.

James Meyer can be reached at james.meyer@ces-inc.com.

About Cutting Edge Solutions (CES)

Led by enterprise content management (ECM) & advanced data capture industry veterans, CES’s expert solutions empower organizations to access every business document, anywhere and anytime while automating all the labor intensive processes surrounding them. CES helps clients lower content management costs, enhance security, ensure compliance and increase process efficiency. Thanks to CES’s years of experience, it is internationally known for creating advanced capture solutions that other vendors would not even attempt. www.ces-inc.com
