

## Complete ECM Solutions

ces, inc. partners with organizations to automate information and resource-intensive business processes that help improve their bottom line.

We are a premier full-service solutions provider for top award-winning imaging, data capture forms processing, document management, business process automation, workflow, records management and scanning solutions.

ces provides organizations with the industry, vertical and technical expertise required to help them maximize their effectiveness and value of their investments by connecting people, processes and content through workflow automation resulting in:

- ◆ Improved company performance
- ◆ Enhanced customer service
- ◆ Increased employee productivity
- ◆ Significant cost savings

## return on investment

Organizations of all industries and sizes are impacted by the roller-coaster economy and many are facing challenges due to global downsizing.

In a tight economy, one of the first things organizations do is identify areas where costs can be cut and for ways where efficiencies can be gained.

Automating information and labor centric processes are some of the few areas of technology that can deliver a hard financial return on investment.

ces facilitates the automation of paper and electronic documents as well as labor-intense business processes that in return increase efficiencies and reduce costs.

*"We selected ces because of their reputation as the leader in developing document-imaging systems. Everyone is raving about the retrieval capabilities, customer service has improved, which makes us more competitive, and we are benefiting from initial cost reductions of more than \$442,000 annually for the 1st phase of the project."*

**Scott Courson, MHC Business Systems Analyst**

## Complete ECM Solutions

### ces differentiators

As a seasoned solutions provider for the leading collaborative information and business process automation manufacturers, ces brings together diverse components into a single solution that provides organizations with unprecedented visibility and control over their documents, electronic information, and the processes that surround them.

Five core competencies form the foundation for all of our solutions:

**Approach:** Our clients come first. Our independent consultative approach recognizes that each organization is unique. Years of experience in providing automated solutions across all markets allows us to help educate our clients on what other organizations have accomplished in similar situations.

**Expertise:** We leverage unsurpassed technical proficiencies, well-established vendor partnerships, and systems integration experience to deliver more robust, stable solutions.

**Methodology:** We follow a proven Six Sigma methodology to deliver the highest possible business performance, with maximum reliability and value to our clients.

**Software and Hardware:** Because we are not tied to any single manufacturer, our certified engineers have the flexibility and expertise to configure solutions that are tailored to each client's individual needs.

**Personalized Customer Support:** Our certified engineers are passionate about helping out clients achieve success through our dedicated customer support website, [www.teamces.com](http://www.teamces.com).

### services

ces delivers a range of affordable, easy-to-use, quick-to-implement solutions that are designed with the scalability and flexibility critical to meeting the needs of any size organization. They include:
